

Enhance Accessibility for Travelers Who are Blind or Have Low Vision

Easy to deploy (no training or hardware) - **Affordable** (\$5K-\$40K/year)

Supporting people with disabilities is an ongoing imperative for Airports and Airlines. Launched in 2017, Aira is a proven solution, deployed at over 50 US Airports and provided a combined 47 years of 24/7 service.

Navigation made simple

Remote, **live** Aira Agents provide real-time personalized instructions and information via the free Aira mobile app. Travelers can **freely and confidently move through crowds, avoid obstacles, and arrive at their desired locations** on time, improving their overall experience.

Adapt to Changes

Flight delays, gate changes, construction, and COVID protocols are common challenges for all travelers. With Aira, an agent can **review schedule boards and inform the traveler of any adjustments** to be made.

Enhance Wait Time

Passengers consistently cite wait time as a negative in their airport experience. With Aira, an agent can **direct a traveler who is blind or has low vision to available seating, comfort stations, or a nearby restaurant**, and interpret menus rather than have to rely on busy staff for assistance.

Aira Combines the Latest Technology with Human Interaction

What is Aira?

Aira is #1 app and service for the blind, low vision and elderly community. Aira's 24/7 service connects travelers who want personalized information to professional, in-country agents who describe the traveler's environment and use the Aira Information Dashboard (AID™) to access the internet, airport details and more.

The Aira mobile app makes use of camera and video enabling an Aira Agent to assist through visual interpreting and virtual assisting –describing, reading, explaining, navigating, planning—just about anything.

At the touch of a button, Aira delivers instant access to information, enhancing efficiency, engagement, and independence.

What is the Aira Airport Network?

The Aira Airport Network equips transportation authorities with the ability to make the on-demand service available to anyone when they are on premise. Over 50 airports are members and more than 65% of all large hub airports partner with Aira.

Deployment and Maintenance Made Simple

Aira provisions the service in one day by creating a GPS based "geofence" making Aira available while on campus; completely supported and maintained by Aira.

- **No change or impact to Airport Operations**
- **Eliminates the need to provide push-assist** as an accommodation allowing staff to focus on others.

*"I have traveled hundreds of airports across the country. This is the first time I could do so **without assistance. fantastic!**"*
