

## What is Aira Access?

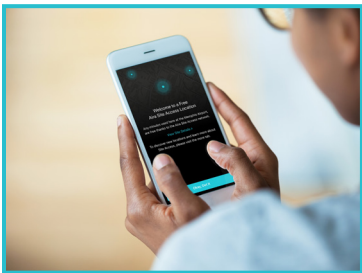

Aira Access is a turn-key solution for enhancing accessibility. Blind and low-vision people can use Aira for free through Aira Access. We've partnered with some of the most well-known businesses in the world to provide free Aira service to more people, in more ways.

## Aira Access Locations

This solution works similarly to Wi-Fi.

- You can set up Aira Access for one, or many, business locations.
- We geofence your chosen location(s) to allow anyone inside to connect with an agent.

## How does it work?

When a blind or low-vision person with the Aira app on their smartphone enters your location, they'll be notified that Aira is free to use. All they have to do is tap the call button and they'll be connected to one of our professional agents. Our agents are specially trained to provide objective visual information that complements blind and low-vision people's Orientation & Mobility skills.

## What are the benefits?

- Open an untapped market by giving 10 million blind and low-vision people in the US the same experience as your sighted customers.
- Lead the way in providing accessibility and become a truly inclusive company.
- Zero effort to install, maintain, or track – we manage it all for you.
